

About

AL13® systems are distributed through an extensive North America Dealer network in order to provide the highest level of service.

AL13® products are made of coated aluminum, providing an outstanding maintenance-free finish that endures the elements. Our products will resist sagging, peeling, corroding, fading, warping, rotting or cracking, unlike traditional cladding and soffit applications.

AL13® systems provide a significantly lower lifetime cost when factoring maintenance, repair, and replacement associated with many other building envelope alternatives.

Patented

The comprehensive approach we've taken to design and engineer each product specific for our AL13® patented and proprietary systems means that we're able to deliver an end user experience that is truly greater than the sum of its parts. [Get more info at AL13.com/patents](http://www.AL13.com/patents)

AL13® System Compatibility

AL13® systems work together using the same frame components, allowing for flawless transitions between Panel and Plank Systems without the need for flashing.

Your Project

Let us show you how AL13® can benefit your project. Submit your drawings at www.AL13.com/estimates for a takeoff and material estimate.

orders@al13.com

No additional off-site fabrication required. Panels are cut to fit on-site and secured using a patented process, saving time and money.

Get the look of wood, with the durability of metal.

Fire Safety 1

AL13® panels are available in standard polyethylene and fire resistant mineral filled thermoplastic cores.

- ASTM E84 - Flame spread (0) - smoke development (20)
- NFPA 285 - Compliant wall assembly
- CAN/ULC-S102 - Flame spread (0) - smoke development (10)
- CAN/ULC-S134 - Compliant wall assembly

Wind + Water 2

AL13® panels are cut to fit on-site and secured using rigorously tested compatible system frame components, allowing for on-the-fly changes and seamless transitions between both AL13® systems.

AL13® system clips and extrusions work together to create a secure system with built-in moisture management.

- AAMA 508 - pressure equalized rainscreen
- ASTM E330 - structural / wind load

Finish 3

AL13® panels come in any color of the rainbow, with an industry-leading warranty.

- AAMA 2605 - coating finish standard

Your Colors 4

Send us a physical sample or color code, and we can match it for no additional charge, submit requests to samples@al13.com

* extrusions are coated in a matching solid tone

Fire Safety 1

AL13® planks are made of solid non-combustible extruded aluminum.

- ASTM E84 - flame spread (0) - smoke development (0)
- ASTM E136 - non-combustible
- CAN/ULC-S102 - flame spread (0) - smoke development (0)
- CAN/ULC-S114 - non-combustible

Wind + Water 2

AL13® planks are cut to fit on-site, secured using system clips and system frame components, allowing for on-the-fly changes. AL13® system clips and extrusions work together to create a secure system with built-in moisture management.

- AAMA 508 - pressure equalized rainscreen
- ASTM E330 - structural / wind load

Finish 3

Our system comes in 6 standard woodgrain options. We also have the ability to deliver any color or woodgrain to match your project - with an industry leading warranty.

- AAMA 2604 - coating finish standard
